RXO™ ability (8 Base) Sphere -/+ 4 dpt incl. 2 dpt
cyl. Power

RXO™ ability (8 base) please contact your local lens
supplier to ensure the use of recalculated 8 base
lenses, which consider the high wrap angle.
Unless use the Silhouette wrap-around calculator
to counterbalance optical discrepancies due to
the higher wrap angle. For an accurate result we
recommend high index optical blanks.

Please contact your local lens supplier for detailed
specification (lens colour, coatings, material) and
also in case of bifocal or progressive lenses.

**Detailed RXO™ information is contributed in the
RXO™-catalogue sheets (K 9999 A1 0000 1000)**
